Highline College

Des Moines, Washington

September 2017- December 2019

## Projects

### Mobile App Developer, Start Up Capstone Project

September 2023- Present

- Collaborated on an Agile team to develop an innovative Android application.
- Project management, spearheading sprint planning and retrospectives, ensuring alignment with project objectives.
- Worked with cross-functional teams, optimizing UI/UX using Figma and back-end functionalities.
- Navigated evolving project requirements, showcasing adaptability and commitment to excellence.

### Full-Stack Web Developer, Small Business Website Project

August 2023 - Present

- Designed an engaging and responsive UI/UX for a small business using Figma, focusing on ease of navigation and brand consistency.
- Developed the front-end interface using HTML, CSS, and JavaScript in Visual Studio Code, integrating the design prototypes into a functional website.
- Implemented a cloud-based database solution for storing and managing customer data securely, including designing the database schema and setting up the server-side logic to facilitate data transactions.
- Ensured best practices in responsive design, SEO optimization, and data security to deliver a comprehensive web solution.

## Experience

### Sales Specialist

Apple

April 2022 – Present

- Exceeding customers' satisfaction with a personalized interaction based on their individual interests. Met with a strong knowledge-based recommendation tailored to their passions. Providing solutions for both technical and product related.

### Electrician Apprentice

Farmers Electric

June 2021 – April 2022

- Low-voltage, residential and commercial training in quality installation ranging from data cables, and main power lines. Adapt to everyday engineering schematic changes, set deadlines, and team training.

### Advisor

Best Buy

September 2018 – July 2021

- Multi-role positions being able to flex between different departments. Maintaining inventory standards, training of new employees and exceeding sale goals.
